

Case Study: Development of a Simple Survey Tool

Use Case

As a Team Member, I would like to rate questions of an anonymous survey to give my opinion about teamwork.

Acceptance criteria

- Survey is displayed at the URL “/surveys/[id]”
- The user can rate 5 questions
- Survey results are stored in database
- The survey results are accessible at the URL “/api/surveys/[id]/results” in JSON format

Architecture

- Spring Boot
- REST API
- Front-End: Vue3
- Database: As you want
